Resident Transfers at the PGY-2 Level

- RC's expectation is that residents will complete the PGY-1 year within an ophthalmology program (integrated format) or affiliated preliminary year program (joint format)
- As of July 1, 2023, a PGY-2 resident transferring into a program who did not complete the PGY-1 year this way or did not complete the PGY-1 requirements puts a program at risk of a citation or area for improvement (AFI)
 - If a program accepts such a resident, they may provide a rationale in the "Major Changes and Other Updates" section

#ACGME2023

Non-clinical Activities During PGY-1

- Dedicated **research** time may take place **only** during the three months of ophthalmology
- The nine months of required non-ophthalmology experience must be comprised of clinical rotations
 - Relevant non-clinical experiences **may be** integrated into the clinical rotations
 - However, **most** resident time must be in clinical activities

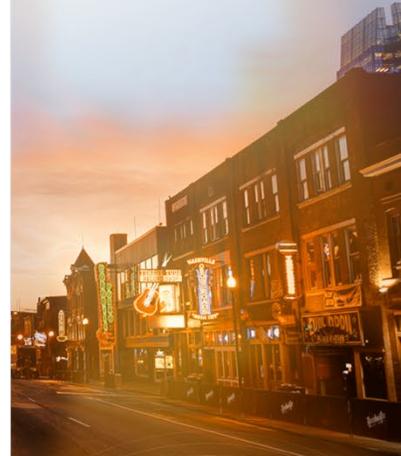

2023
ACGME

Ophthalmology Case Log

©2023 ACGME

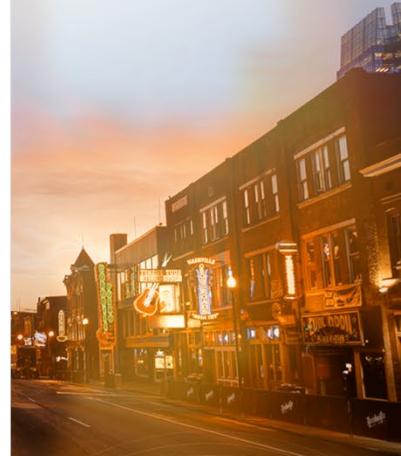

ACGME
ANNUAL
EDUCATIONAL CONFERENCE

FEBRUARY
23-25, 2023

NASHVILLE
TENNESSEE

Ophthalmology Case Log

- The Case Log System is used by the RC to
 - To assess the breadth and depth of a program's procedural training
 - To understand residents' experiences
- Minimums
 - Represent what the RC believes to be an acceptable minimal experience
 - Not a final target number
 - Achievement does not signify competence
 - Programs are considered compliant with procedural requirements if all graduating residents achieve the minimum number in each category

2023
ACGME
ANNUAL
EDUCATIONAL
CONFERENCE

FEBRUARY 23-25, 2023
NASHVILLE
TENNESSEE

#ACGME2023

Brief History of the Ophthalmology Case Log

- The minimums were set in 2006 at the 20th percentile
- The RC has periodically reviewed the minimums and so far, has determined they remain appropriate
- A few minimums are low because the RC expects residents to have **familiarity** with some subspecialty procedures
- Similar reasoning was used for including the assistant role towards the minimum in the keratoplasty, keratorefractive surgery, and retinal vitreous categories

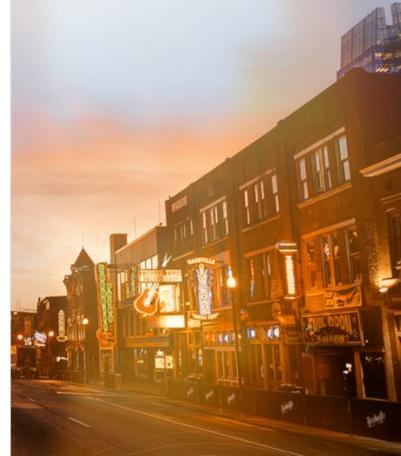

— 2023 —
ACGME

#ACGME2023

Ophthalmology Case Log: Where are we now?

- In recent years, an RC Case Log Subcommittee has conducted a thorough review of the system
 - Oculoplastics and orbit area reorganized
 - More than 240 additional CPT codes now being tracked, with approximately 50 giving credit towards a minimum
 - New area “Examination/clinical procedures/testing” created—logging is *optional*
 - Updated [Case Log Information](#) posted on the ACGME website
- A goal is to have more complete data regarding residents’ experiences to ensure the RC can make data-driven decisions

#ACGME2023

Ophthalmology Case Log: Where are we now?

- The subcommittee has also held on-going discussions about MIGS, with the following steps taken:
 - Communication to programs regarding how to log MIGS cases and a reminder that residents should log all glaucoma experiences
 - New CPT Codes 66989, 66991, and 0671T give credit to the glaucoma-filtering and shunting minimum
 - (66989 and 66991 also give credit to cataract minimum)

ACGME
ANNUAL
EDUCATIONAL CONFERENCE

FEBRUARY
23-25, 2023

NASHVILLE
TENNESSEE

Issues of Most Concern to the RC

- Insufficient procedural experience (Graduate Case Log Report)
- Deficiencies in didactic and/or clinical education (Ophthalmology-specific Resident Survey items)
- Unprofessional behavior (Resident and Faculty Surveys)
- Work hours, service/education balance (Resident and Faculty Surveys)
- Poor Board exam performance (ABO and AOBOO-HNS Report)

#ACGME2023

2022 Surveys: Areas in Need of Attention

- Resident participation in real and/or simulated patient safety investigation and analysis
- Resident and faculty involvement in recruiting and retaining diverse residents
- Resident understanding of work hours rules (e.g., several averaged over four weeks)
- Health care disparities education
- Sleep and fatigue education
- Integrating cost awareness into patient care decisions

ACGME
ANNUAL
EDUCATIONAL
CONFERENCE

FEBRUARY 23-25, 2023
NASHVILLE
TENNESSEE

#ACGME2023

Quality Metrics and Benchmarks

- Residents and faculty members must receive patient care data to review practice patterns and/or outcomes [CPR VI.A.1.b).(2).(a)]
- Data does **not** need to be faculty- or resident-specific—it can be at the service, department, or site level
- A program site likely has existing data that can be used to meet this requirement and foster practice improvement
- Data examples: Surgical complications, post-operative infections, return to the operating room, needle stick injuries

Letter of Notification

RC sharing general information, updates, and tips under “Other Comments”

Based on the information available to it at its recent meeting, the Review Committee accredited the program as follows:

Status: Continued Accreditation
Maximum Number of Residents: 20
Residents per Level: 5 - 5 - 5 - 5
Effective Date: 01/12/2023

The Review Committee commended the program for its demonstrated substantial compliance with the ACGME's Program Requirements and/or Institutional Requirements without any new citations.

OTHER COMMENTS

The Review Committee for Ophthalmology would like to inform all programs of the following items regarding diversity, patient safety/quality improvement, fatigue mitigation, the block diagram, ACGME Surveys, and FAQs:

Diversity: Programs are reminded to involve residents and faculty members in the program's diversity efforts. The Committee uses the Resident and Faculty Surveys' Diversity and Inclusion domain to help determine program compliance in this area.

Patient Safety/Quality Improvement: The 2022 Resident and Faculty Surveys indicated an area of improvement for many programs is providing residents with opportunities to participate in real and/or simulated patient safety investigations including analyses and implementation of actions. Experiential learning is essential to developing competence in patient safety investigations. Examples of activities include Root Cause Analyses and M&M conferences that include identifying and implementing solutions.

Fatigue Mitigation Education: The 2022 Resident Survey also identified fatigue mitigation

1

< Back To Fellows

Academic Years

2021 - 2022

Fellow Scholarly Activity Post Graduate PMIDs

2

Post Graduate PMIDs Add

3

For reporting year 2021-2022, in the previous 5 academic years (between 2020-2021 and 2016-2017), did any of your fellows participate in scholarly activity PMIDs that were published AFTER the fellow graduated? If applicable, add and only report scholarly activity that occurred during their fellowship and was not previously reported. PMIDs that were previously reported in this program will not be accepted.

Intent: Used as a supplement to the program's fellow scholarship from the last five graduate cohorts. Meant to capture work that the fellows had started while training in the program and were moved to publication after their graduation date. It is not meant for scholarly work after leaving the training program.

Block Diagrams

- **Representation** of program's rotation schedule
 - **Not** actual residents' schedules
- Ophthalmology-specific [Block Diagram Instructions](#) on ACGME website

Block Diagram Instructions Review Committee for Ophthalmology

A block diagram is a representation of the rotation schedule for a resident/fellow in a given post-graduate year. It offers information on the type, location, length, and variety of rotations for that year. When creating a block diagram, keep in mind:

- The block diagram shows the rotations a resident/fellow will have in a particular year of the educational program; it does not represent the order in which they occur.
- There should be only one block diagram for each year of education.
- The block diagram should not include resident/fellow names. The block diagram is not a resident/fellow schedule.
- Someone from outside of the institution should be able to look at a program's block diagrams and understand the educational experience of the residents/fellows.

Tips for Completing the Block Diagram

- Programs that have established the integrated or joint format **must** include a block diagram for the PGY-1 year.
- Identify sites by using the site numbers listed in the Accreditation Data System (ADS) Sites tab (1, 2, etc.).
- Within each year, group rotations by site. For example, list Site 1 rotations first, followed by Site 2 rotations, etc.
- Ensure the block diagram information matches the Participating Site information section of ADS. For example, if the participating site information in ADS indicates Year 1 residents spend three months at Site 2, the block diagram should show Year 1 residents are at Site 2 for three months.
- The "% Research" row in the block diagram is for **dedicated** research time **reserved** on a resident's/fellow's schedule.
- Rotation names should be as specific as possible and identify the **educational experience** (e.g., general ophthalmology, glaucoma, pediatric ophthalmology).
 - The rotation name must include more than the name of the site. For example, "VA" is an insufficient description of the educational experience, whereas "VA Comp Ophth" is acceptable.

Did somebody say
**Major Changes and
Other Updates?**

Major Changes and Other Updates

Use **Major Changes and Other Updates** to communicate to the RC about:

- Low ACGME Survey ratings
- How the program has addressed any Areas for Improvement
- Program changes (rotations, faculty)
- Innovations
- *TIP: Keep a running document during the year of program highlights, changes, and challenges*

Program Application Information

Overview

An ACGME-accredited Sponsoring Institution interested in seeking ACGME accreditation for a program must initiate, prepare, and submit a program application. It typically takes six to 12 months to gather the necessary information and complete the program application. After the submission of the application, it may take four to 12 months for the relevant Review Committee to make an accreditation decision regarding the program's application. This page provides additional information about the application submission and review process for program accreditation applications.

For an institution to apply for accreditation of a program, it must be accredited by the ACGME as a Sponsoring Institution. Learn more about Sponsoring Institution accreditation [here](#).

| Complement Breakdown: Approved | | | | | |
|--------------------------------|-----|-----|-----|-----|-------|
| Years: | 1 | 2 | 3 | 4 | Total |
| Approved: | 8.0 | 8.0 | 8.0 | 8.0 | 32.0 |

| Complement Breakdown: Filled | | | | | |
|------------------------------|-----|-----|-----|-----|-------|
| Years: | 1 | 2 | 3 | 4 | Total |
| Filled: | 8.0 | 8.0 | 8.0 | 8.0 | 32.0 |

For program uploads

- Documents requested by a field representative
- Requests from the RC (e.g., Progress Report)

ACGME Surveys

- Surveys opened **February 13, 2023 for 8 weeks**
- This year, programs remain responsible for notifying and reminding residents/fellows and faculty to complete survey
- Starting in **2024**, likely that **ACGME** will **notify** residents/fellows and faculty when the survey opens

Self-Studies and 10-Year Site Visits

- Self-study and 10-year site visit process re-design still underway
- *What should programs do for now?*
Continue to conduct and document high quality annual program evaluations

Stay tuned!

Common Program Requirements

Revised Common Program Requirements (CPRs) in effect July 1, **2023**

- Number of CPRs reduced
- A few revisions may impact programs, e.g., annual program evaluation requirements significantly reduced
- Review revisions on acgme.org > What We Do > Common Program Requirements
 - *TIP: Review Tracked Changes Copy*

Resident/Fellow Leaves of Absence

Effective July 1, 2022, the Institutional Requirements require Sponsoring Institutions to provide residents and fellows with at least six weeks of paid medical/parental/ caregiver leave

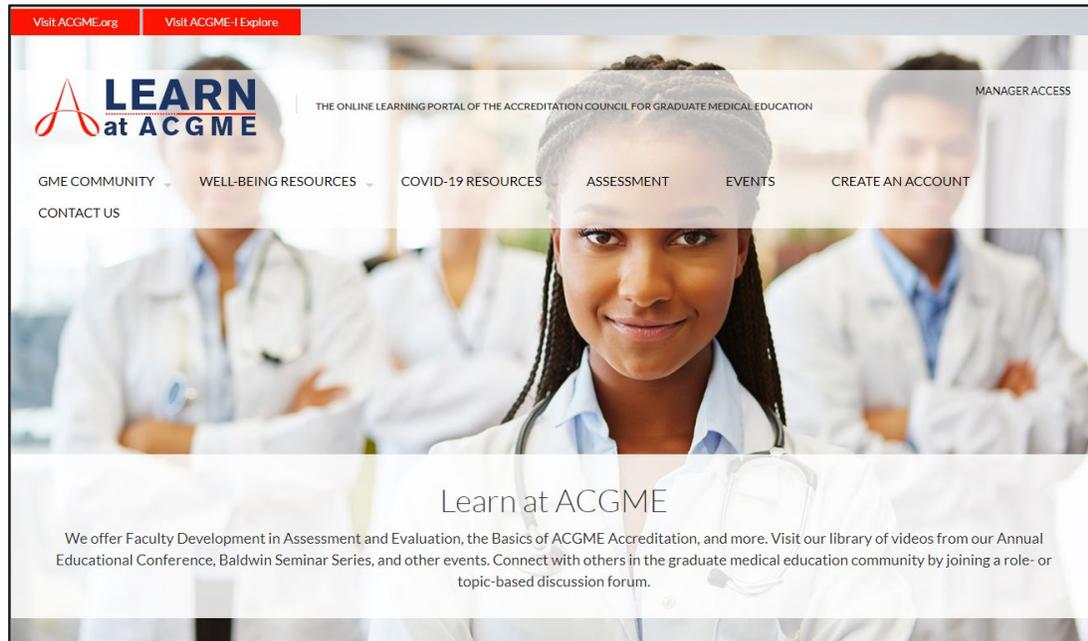

- Look to the Sponsoring Institution and Boards for guidance
- RC **requires** a resident/fellow to be in program for a minimum amount of time from start to finish
- RC **does not** have requirements about leaves or vacations
 - *No need to contact the RC about a leave*

- Multi-Source Feedback

April 11, 2023

Registration required

An ACGME listening session focused on creating a space for program directors to share experiences and hear from peers regarding issues related to program director well-being.

Join the event for an open discussion of challenges faced by program directors and potential solutions.

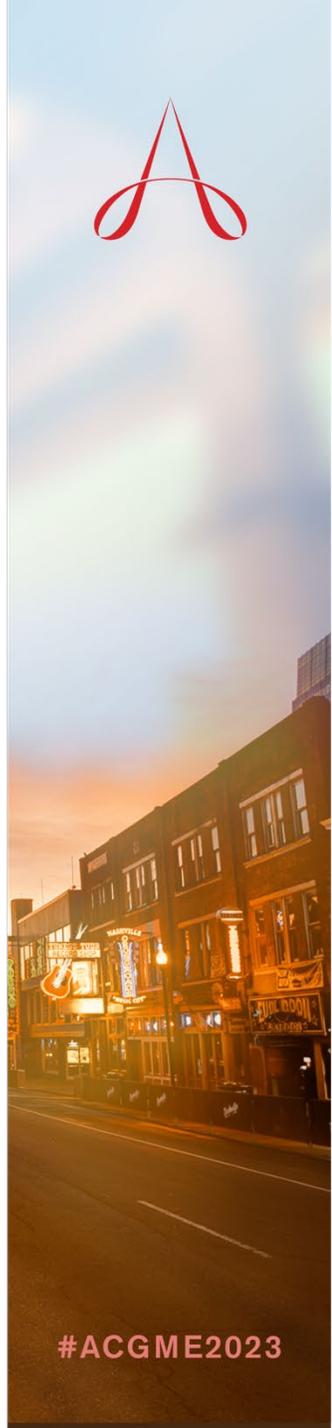

Milestones 2.0 Update

Celebrating the completion of Milestones 2.0 for all specialties this spring!

Multi-year Milestones Program Evaluation will begin this fall. Many opportunities to share your thoughts via focus groups, surveys, and interviews. Watch the Milestones Engagement page and the weekly ACGME Communications email!

Milestones Resources

Resources are added and updated throughout the year

Current resources include:

- CCC Guidebook
- Assessment Guidebook
- DOCC and TEAM Assessment Tools
- Clinician Educator Milestones
- Resident and Fellow Guidebook

Clinician Educator Milestones

- Joint effort of the ACGME, ACCME, AAMC, and AACOM
- Designed to help develop teaching skills
- **Not** an ACGME requirement
- Available at [acgme.org > What We Do > Milestones > Resources](https://www.acgme.org/What-We-Do/Milestones/Resources)

| Universal Pillar 1: Reflective Practice and Commitment to Personal Growth | | | | |
|---|--|---|---|---|
| Level 1 | Level 2 | Level 3 | Level 4 | Level 5 |
| Accepts responsibility for personal and professional development by establishing goals | Demonstrates openness to performance data (feedback from learners and other input) to inform goals | Seeks performance data episodically, with adaptability and humility | Consistently solicits specific performance data, with adaptability and humility, including from learners, that leads to behavior change | Role models consistently seeking performance data with adaptability and humility and making positive behavior changes |
| Identifies the factors that contribute to gap(s) between expectations and actual performance | Analyzes and reflects on the factors that contribute to gap(s) between expectations and actual performance | Analyzes, reflects on, and institutes behavioral change(s) to narrow the gap(s) between expectations and actual performance | Challenges personal assumptions and considers alternatives in narrowing the gap(s) between expectations and actual performance | Coaches others on reflective practice |
| Actively seeks opportunities to improve | Designs and implements a learning plan, with prompting | Independently creates and implements a learning plan | Uses performance data to measure the effectiveness of the learning plan and, when necessary, improves it | Facilitates the design and implementation of learning plans for others |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| Comments: Not Yet Completed Level 1 <input type="checkbox"/> | | | | |
